OpenVirtualToxLab™ — License Agreement

The *VirtualToxLab™* is an *in silico* tool for predicting the toxic potential (endocrine and metabolic disruption, some aspects of carcinogenicity and cardiotoxicity) of drugs, chemicals and natural products. The technology is based on a automated protocol — accessible through the Internet — and calculates the binding affinity of any molecule of interest towards a series of 16 proteins (the androgen, aryl hydrocarbon, estrogen α/β, hERG, glucocorticoid, mineralocorticoid, thyroid α/β, liver X, progesterone and the peroxisome proliferator-activated receptor γ as well as the enzymes cytochrome P450 1A2, P450 2C9, P450 2D6 and P450 3A4) known or suspected to trigger adverse effects and estimates its toxic potential. The *VirtualToxLa* allows verifying a prediction at the molecular level by visualizing the binding mode of the tested compound with all target proteins in real-time 3D and atomic resolution.

The *OpenVirtualToxLab™* is a licensed program and its use implies the acceptance of the following terms:

TERMS

1. A non-exclusive, non-transferable License is granted to the Licensee to install the *OpenVirtualToxLab™* graphical-user interface, including the *VTLViewer* and *VTLBuilder* under Macintosh, Linux, or Windows operating systems and to access the *VirtualToxLab* over the Internet. Access to and use of the technology are restricted to the Licensee and his/her collaborators at his/her institution.

2. The Licensor — the Biographics Laboratory 3R — retains ownership and copyrights of all material — *OpenVirtualToxLab™* graphical-user interface, *3D/4D VTLViewer*, *VTL Builder* and all underlying software, models, and documentation — delivered to the Licensee or implicitly used through the *VirtualToxLab* technology.

3. The Licensee agrees that the Licensor in no way warrants the results (binding modes, binding affinities, toxic potential) generated by the *VirtualToxLab* technology and is in no way liable for any use the Licensee makes of the results.

4. If the Licensee receives a request to furnish all or any portion of the Software to any third party, he/she will not fulfill such a request and will refer it to the Licensor.

5. The Licensee will not make available any access information to the technology to any third party.

6. The Licensee agrees that in any reports or publications of results obtained with the Software, he/she will acknowledge its use by an appropriate citation. Until further notice, this refers to: Vedani, A., Dobler, M. and Smiesko, M. (2012). VirtualToxLab — A platform for estimating the toxic potential of drugs, chemicals and natural products. *Toxicol. Appl. Pharmacol*. *261*, 142–153 and/or Vedani A., Dobler, M., Hu, Z., and Smiesko, M. (2014). OpenVirtualToxLab — A platform for generating and exchanging in silico toxicity data. *Tox. Lett.* (in press); open access; free download at http://www.sciencedirect.com/science/article/pii/S0378427414013277.

7. The Licensee acknowledges that no transaction over the Internet is completely secure, but the Licensor agrees to use commercially reasonable efforts to keep confidential all information submitted by the Licensee, including the use of reasonable technological measures to secure any data provided by the Licensee and stored on computers owned or controlled by the Licensor.

8. The Licensee agrees that the Licensor may publish selected results generated by the Licensee using the *OpenVirtualToxLab*™ technology in scientific journals, its website or present at scientific conferences. The Licensor shall inform the Licensee beforehand and he/she may — within 30 days — request postponing the publication/presentation or, given good reasons, veto it.

9. The *VirtualToxLab*™ may not be used for any military purposes or for the testing of chemicals associated with biological or chemical warfare.

10. The Licensee acknowledges that no support services are included in this License.

11. The Licensee agrees that his/her account will be cancelled after one year of inactivity. Thereafter, a new license may be requested at any time.

12. This License will terminate immediately if the Licensee fails to comply with any provision of this License. Legal action is explicitly reserved. The jurisdictional venue for legal disputes is Basel, Switzerland.
